

SASCRO SASMO CONGRESS 2015

Awards for registrars / fellows

Clinical & Radiation Oncology (SASCRO),
Medical Oncology (SASMO) &
Paediatric Oncology (SACCSG)

Oral & Poster Presentation Awards

Both oral and poster presentations will be taken into consideration for the Awards in three categories: Clinical & Radiation Oncology, Medical Oncology & Paediatric Oncology.

Guidelines that should be considered in the preparation of the presentation:

1. Only papers that report on properly planned scientific studies will be considered for the awards. The results of the study are not as important as the fact that the research has been well planned and executed.
2. Where the results obtained from the research have relevance to management decision making or basic science, the presentation would receive more recognition.
3. Also considered in awarding the award will be the presentation style, appropriate use of audio-visual equipment and keeping to time limits.
4. Presentations may be done in the first two years following the completion of the registrar / fellow period, provided that the research was commenced during the time as registrar / fellow. This will have to be confirmed by the head of the relevant department.
5. The two statements must be signed and returned to the congress organiser before the start of the congress.

Guidelines to be considered in the preparation of the poster:

1. The selection of the topic is at the discretion of the presenter and can include case presentations.
2. Presentations may be done in the first two years following the finalization of the registrar / fellow period, provided that the research was commenced during the time as registrar / fellow. This will have to be confirmed by the head of the relevant department.
3. The following statements must be signed and returned to the congress organiser before the start of the congress.

Name and surname of Presenter: _____

Statement 1:

I hereby confirm that:

- The presenter commenced the research presented in this presentation during his/her time as registrar / fellow.
- The presentation is presented less than two years after completion of his/her registrar / fellow training period.

Signed by and dated by the Head of the Department: _____

Statement 2:

I hereby certify that the research I am presenting was initiated and conducted by me and the co-authors as stipulated.

Signed and dated by the presenter: _____
